

JANOME

Accessory of the Month

March 2018

Optic / AcuView Magnifier

The perfect attachment to help enhance your sewing capability. The Optic / AcuView Magnifier allows you to get a closer view of the sewing area. Attach the magnifier to make it easy to see the tiniest detail within the needle area of your machine. This attachment can be useful when threading, adjusting the position of the fabric, and carrying out detailed work. The magnifier can be used whilst sewing or can swivel out of the way when not in use.

This Accessory of the Month has a bonus project for you to make using the Optic / AcuView Magnifier. Press the link to download the project and instruction sheet for attaching the magnifier to your machine.
