

JANOME

Accessory of the Month

April 2018

Embroidery Clothsetter

The Janome Clothsetter has taken the guesswork out of positioning your embroidery. It ensures perfect placement of single designs on your project and multiple designs within the same hoop or between multiple hoopings. It's so easy, and only Janome has it. With the ability to lock the hoop into a stable surface you can then move the fabric to line up with the Janome Clothsetter arm to position in the correct place before completing your hoopings.

This Accessory of the Month has a bonus project for you to make using the Clothsetter. Press the link to download the project .
