

# JANOME

## Accessory of the Month

August 2018

### AcuFil Quilting Embroidery Kit

This AcuFil™ Kit allows you to perfectly stipple your quilts or quilting projects giving you a professional quilted finish. As the process is carried out using the embroidery machine it also means that you can comfortably embroider curves and feathers if you are not the most confident quilter. Simply use the software on a PC to design a single hooping or all over stipple, print the template and start the quilting process. The software allows for many different options and includes designs already loaded to select from to get you started.

This Accessory of the Month has a bonus project for you to make using the AcuFil Quilting Embroidery Kit. Press the link to download the project .

### HOOPED EMBROIDERY QUILTING

| Part Number | Compatible Machines                                |
