Cording Foot (A) for the Overlocker

Your overlocker can be used for more than just the basics. With the Cording Foot (A) you can utilize the rolled hem facility on your machine to finish beautiful garments and accessories. This foot is ideal for bridal and evening wear and allows you to insert fine fishing line while rolling the edge of your material giving you a beautiful firm but flexible finish. The foot aids the process for you to be sure that you can flute the edges of the hem without cutting the fishing line.

This Accessory of the Month has a bonus project for you to make using the Cording foot (A) for the overlocker. Press the link to download the project .
