

# JANOME

## Accessory of the Month

February 2019

### ACUFEED FLEX™ - Single VD Foot

In addition to the original twin type, single type feet can now be used, expanding sewing possibilities. AcuFeed Flex™ keeps your thickest, trickiest layers moving in perfect sync with the feed dogs. You will love the AcuFeed Flex™ feet for stitching your fluffiest quilts, installing zippers, or matching seams!

The single AcuFeed foot is great for those crafty projects which have some bulk but lets you get in close to sew a narrower area as well as the edge of cloth.

This Accessory of the Month has a bonus project for you to make using this AcuFeed Foot. Press the link to download the project .

### [CREATIVE BOOK COVER](#)
