

The Power of Air AirThread 2000D PROFESSIONAL

One push blast
air threading system

Built-in needle threader

Easy access

Integrated dial

The JANOME AirThread 2000D Professional unites ease-of-use with the specialised function of an advanced overlocker. It's our easiest to thread overlocker ever! Just push the lever and the air will blow the threads through the loopers. There's no need to fear overlockers anymore. With the new Janome AirThread overlocker everything is easy!

New Threading system

The new thread delivery system with lever ratchet mechanism makes stable air threading. Simply insert the thread into the looper threading hole, follow the easy steps and the air will blow the thread through the looper in this one push blast air threading system.

Built-in needle threader

It's easy to thread the needles and will save you time too. By simply sliding the needle threader switch lever to R for threading the right needle or L for the left needle you'll be ready to go in no time.

Easy access

No need to open the side cover the dials are all in one place! Easily adjust the cutting width to ensure stitches sit correctly on the edge of the fabric, even on curves whether the fabric is bulky or fine. The upper knife can be easily deactivated for decorative flatlock and pintucking etc.

Integrated dial

The cleverly integrated stitch length and differential feed dials can be easily adjusted to the perfect setting for your fabric whether sewing stretch or lightweight fabrics. Experiment to create gathers or decorative lettuce leaf edgings.

Stable running

This is a reliable and robust overlocker. The main shaft is equipped with two ball bearings which provide low torque, making it powerful and stable running even at high speeds.

JANOME

Standard accessories

Also included is:

- Spare upper blade
- Accessory box
- Dust cover
- Wire looper threader for use with heavier threads

Optional accessories:

- Blind hem foot
- Cording foot I & II
- Beading foot
- Beading guide
- Gathering attachment
- Elastic gathering attachment
- Piping foot 3mm & 5mm
- Gathering foot
- Cloth guide

Machine size (mm)	W374 × H280 × D284 (Incl. hand wheel)
Machine weight (kg)	7.9kg
Bed type	Flatbed
Number of spool pins	4
Carrying handle	Integrated with rear cover
Maximum speed (spm)	1300
Type of needle(s)	Standard ballpoint Organ HAX1-SP#11/14
Number of needles	1/2-needle
Number of threads	2/3/4-thread
Length of feed (mm)	1.0 - 5.0
Standard stitch length (mm)	3
Differential feed ratio	0.5 - 2.0
Feed dog	8 pcs
Upper knife opening amount	9.5
Cutting width	5.5-7.5 using left needle 3.3-5.3 using right needle
Presser foot pressure adjustment	Dial (5 levels)
Presser foot change	Snap-on/off
Presser foot height (mm)	5.5
Thread tension adjustment	Manual
Pre-tension	Slide-in
Needle threader	Built-in
Upper looper threader	One push blast air threading system
Lower looper threader	One push blast air threading system
Lamp	White LED (1 place)
Safety switch	Looper cover / Side cover / Presser foot lift
Built-in spreader	Yes
Foot control	Triac (No heat)
Instructional DVD	Included

Adjustable foot pressure dial

Simply dial 'N' for normal sewing. There are five-levels of presser foot adjustment to help feed heavy and lightweight fabrics.

Lower looper pre-tension setting

It's easy to adjust the lower looper tension with this conveniently placed slider. When operated with the easily accessible chaining finger switch you can change from standard to rolled hemming in no time. There's no need to open the looper cover!

Looper selection lever

Simply position your thread and direct the looper selection lever to the looper you wish to thread; to the right for 'threading' the lower looper and to the left for threading the upper looper.

New standard foot

The new standard foot has a smooth flat finish to the base with purpose built indentations. This will help support sewing on thick fabrics and multiple layers, as well as uneven surfaces, and help prevent needle damage or skipped stitches. Together with the 8 piece feed dog you can achieve amazing results, even on the lightest weight fabrics.

Wide workspace

Keep your work flat to achieve the best finish. The large flat work area on this machine is perfect for larger projects and the large waste chip box will collect all of the loose threads to help keep your workspace tidy.
