

# JANOME

## Accessory of the Month

November 2018

### Large Buttonhole Foot

This foot works just like the standard 1-step buttonhole foot but larger. The button holder on the back of the foot takes a button from 2.5cm (1") to 5cm (2"). The stabilizer plate holds and supports the fabric so it is very helpful in sewing buttonholes over the hem of thick fabrics. The buttonhole foot doesn't just have to create holes for buttons, you can use this foot for other useful techniques to aid with your sewing projects.

This Accessory of the Month has a bonus project for you to make using the Large Buttonhole Foot. Press the link to download the project .
