

# JANOME

## Accessory of the Month

March 2019

### Ruler Work Foot

This foot was developed for doing ruler work. Guide quilting templates along the edge of the foot to create straight, curved, or repetitious patterns depending on your ruler or quilting template. Rulerwork quilting can create unique finishes to your quilting projects. Using rulerwork rulers and shapes in conjunction with a rulerwork foot, you can achieve the perfect professional looking finish to your quilted projects.

This Accessory of the Month has a bonus project for you to make using the Ruler Work Foot. Press the link to download the project .
