

JANOME

Accessory of the Month

September 2019

HD ROLLER FOOT

An innovative new foot that can smoothly control materials such as leather and vinyl which are prone to catch. When using this foot, the base of the needle is clearly visible, making your work easier.

The Unique Janome feature is the roller can be retracted to the left, to allow for easier threading.

* HD stands for Heavy Duty which emphasizes the durability of this foot, and its shape originates from an industrial sewing machine attachment.

This Accessory of the Month has a bonus project using the HD Roller Foot.
