Accessory of the Month

September 2022

Cover Hem Guide (2) for CoverPro Models

The Cover Hem Guide [Type 2] for the CoverPro Series folds a consistent width of fabric, making it easy to form hems, cuffs and other professional looking cover stitch hems. Use the Hem Guide to line up fabric edges for decorative stitching. For easier, straighter hems, the guide holds the hem in position while sewing and allows you to create 1.5 cm - 4.5 cm hems. The quick release feature allows you to release the fabric on tubular garments near the seam's end for easy finishing.

This Accessory of the Month has a bonus embroidery project.
