

JANOME

Accessory of the Month

February 2023

AcuFeed Single Foot Holder and Feet VD & ED

ACUFEEED: Layered Fabric Feeding System

Janome truly integrates a built-in walking foot with a unique seven-point feed dog system. Since the top layer is fed in perfect timing with the bottom layer, all fabrics move smoothly, even the slippery ones like velvet or thick layers of quilting fabric and batting, and heavy home décor fabrics.

Standard and zipper single type feet available for AcuFeed Flex fabric feeding system only. The single type dual feed attachments let you get in close, to sew a narrower area, as well as the edges of fabric and trims. **VD Foot:** This foot has the power to feed fabrics and is especially effective for top-stitching on the fabric edge or stitching on narrow strips.

ED Foot: Zippers can be attached to plastic coated fabric, leather and any tricky to handle materials without any difficulty.
