

JANOME

Accessory of the Month

September 2023

Pintucking Cord Guides

The pintucking cord guide is attached to a clear plastic bobbin cover, remove machine bobbin cover to attach the pintucking cord guide, then feed perle cotton or other cord through the guide. When stitching the guided cord is easier to control when creating corded pintucks. Two guides are included in the set: one for cord up to 1.5 mm in diameter, the other for cord 1.5 - 2.5 mm in diameter. Use a pintuck foot, twin needle with the pintucking cord guide to create raised decorative corded pintucks. The grooves on the underside of the pintuck foot, match up with the previously sewn pintuck for perfectly spaced rows.

This Accessory of the Month has a bonus embroidery project.
