Accessory of the Month

February 2024

Button Sewing Foot (T)

Your sewing machine will stitch a buttonhole, so *why* sew a button on by hand....let the machine sew-it-on. This foot has two bars that attach to the foot holder to provide extra stability and a textured, rubber sleeve to hold the button securely in place while sewing. Quick and easy button sewing with a special button sewing foot.

Just select zigzag stitch, adjust the stitch width to 3.5mm, drop your feed dogs, place your button under the foot (ensuring on the zig and zag motion allows the needle to enter the holes on the button), then sew 5 across and back. Use the lock-off button to finish, then auto cut-off (if a feature on your machine). It's that easy!

Your machine may have built in *sewing applications*, making this easy task even easier. Also use the button sewing technique to attach: a ribbon, a sewing charm or other items with a hook. Be creative with buttons on projects or fabric art, giving them a 3D effect.
