Janome Even Feed Feet

The even feed foot, sometimes referred to as the walking foot, is designed with a set of feed dogs (teeth) which allow the fabric to feed without shifting and eliminates the problems of the underlayer of fabric coming up short. The even feed foot is great for quilt sandwiches, topstitching and stitching specialty fabrics.

"BOM 2024" is about learning to use various stitches, accessories and techniques.

At the end of the year all blocks are pieced together, quilted and bound into a completed quilt project.
